What is the absolute cut-off date for additional info(comment #'s and the like)? It is possible for 5 changes--all dealing with numbers and actions, no substantive changes--depending on the final date? Thanks.

Ingrid -- Per Steve's request, here's the present draft of the presentation, which includes material supplied by Tony Andrade on EPA and OSHA, slotted into the appropriate sequence in the presentation.

I've also made some slide suggestions for this added material. Today I'll be working on slide suggestions for the rest of the presentation, but wanted to get what had been done to you.

Again, please understand that I'm aware the draft is too long. My intent is to get everything down and then cut, which is far easier than scrambling to find needed facts to add. JGR

I'm also delivering a hard cover copy to your desk as soon as I send this electronic copy out.
